Note: As the OPM Data Breach is under federal investigation, this is an ongoing document that will continue to be updated as more information becomes available. Current questions/answers may be found at www.opm.gov.

Summary

In April 2015, the Office of Personnel Management (OPM) became aware of a cybersecurity incident affecting its systems and data that may have compromised the personal information of current and former federal employees. The breach pre-dates OPM's adoption of tougher security controls.

Since the incident was identified, OPM has partnered with the U.S. Department of Homeland Security U.S. Computer Emergency Readiness Team (US-CERT), and the Federal Bureau of Investigation to determine the impact current and former to Federal personnel.

Between June 8 and June 19, OPM will send notifications to those individuals whose personal information may have been compromised. OPM estimates that up to 4 million individuals may have been impacted. Since the investigation is on-going, additional exposures may come to light; if this occurs, OPM will conduct additional notifications as necessary. OPM will offer impacted individuals 18 months of credit monitoring services and identity theft insurance through CSID® – a company that specializes in identify theft protection and fraud resolution. The 18-month CSID® membership will be offered to those individuals identified by OPM at no cost.

General Information

1. Q: How will I be notified if I am an affected individual?

A: OPM will begin conducting notifications to affected individuals using email and/or USPS First Class mail on June 8, 2015 and will continue notifications on a rolling basis through June 19, 2015.

2. Q: When did this happen?

A: OPM believes that the intrusion occurred in December 2014. OPM became aware of the intrusion into its systems in April 2015 after implementing tough new measures to deter and detect cyberattacks. During its investigation with its agency partners, the FBI and US-CERT, OPM became aware of potentially compromised data in May 2015.

3. Q: What personal information was compromised?

A: OPM maintains personnel records for the federal workforce. The kind of data that may have been compromised in this incident could include name, Social Security Number, date and place of birth, and current and former addresses. It is the type of information you would typically find in a personnel file, such as job assignments, training records, and benefit selection decisions. OPM has indicated that it does not appear that names of family members,

beneficiaries or information contained in actual policies were compromised. Please note, however, that DoD and DON employees and retirees may have had their information included in the human resources information that was compromised. The OPM notification will indicate what information may have been compromised.

4. Q: Why didn't OPM tell affected individuals about the loss of the data sooner?

A: OPM became aware of an intrusion in April 2015. OPM worked with the DHS Computer Emergency Readiness Team (US-CERT) as quickly as possible to assess the extent of the malicious activity and to identify the records of individuals who may have been compromised. During the investigation, OPM became aware of potentially compromised data in May 2015. With any such event, it takes time to conduct a thorough investigation and identify the affected individuals.

5. Q: What systems were affected? Were DoD or DON systems affected?

A: This incident impacts the OPM systems and data. Please note, however, that DoD and DON employees and retirees may have had their information included in the human resources information. For security reasons and due to the ongoing investigation, OPM cannot publicly discuss specifics that might be affected by the compromise of personnel data. OPM has added additional security controls to better protect overall networks and systems and the data they store and process.

6. Q: Are TSP accounts impacted by the OPM cybersecurity incident?

A: TSP account numbers are not shared with OPM and, as such, were not impacted.

7. Q: Where will I receive the email notification?

A: Current federal employees should receive email notification using their work email. Some employees have indicated that the email notification went to their junk mail. It is strongly recommended that employees FIRST check their junk mail for OPM's email notification. The email notification should come from OPMCIO@CSID.com.

Who is Affected

8. Q: How many individuals were impacted by the data breach?

A: OPM estimates about 4 million current and former employees may have had personally identifiable information (PII) compromised. Since the investigation is ongoing, additional PII exposures may come to light. If OPM determines that more individuals have been impacted, they will conduct additional notifications.

9. Q: How many Department of Navy (DON) employees were affected?

A: Currently that information is not available.

10. Q: Were contractors affected by the breach?

A: Contractors were not affected unless they were previously a federal civilian employee.

11. Q: Were current, retired or former military officers affected?

A: The incident did not affect military records. However, if a member of the military was a former civilian employee, their records may have been compromised. If the records were believed to be compromised, OPM will issue a notification to the former employee.

What's Next

12. Q: I received a letter or e-mail stating that I have been affected. What should I do next?

A: Please refer to the instructions on the letter or email. Many who have been notified have been advised to take advantage of the 18-month credit monitoring services and identity theft insurance through the company CSID®. Impacted employees may also call 1-844-222-2743; (international callers can call collect at 512-327-0700) if they have questions. Due to a high volume of calls, employees may experience extended wait times. Typically, employees will not be able to register for the credit services by phone.

13. Q: Can I register by calling the CSID® line?

A: No. After receiving notification, typically employees who have received the OPM notification must register online at <http://www.CSID.com/opm/>.

14. Q: What happens after I register?

A: Within about 24 hours after registering, employees will receive a subsequent email that advises the employee "Your CSID® identity protection report is now available. One or more of your reports have been updated." Typically, the email follows by listing information which will be available to the employee to include: PayDay Loan - A PayDay Loan alert/report may include new inquires of new loans requested at a pay-day loan location using your identity; CyberAgentSM - A CyberAgentSM alert/report may contain matches for your information related to criminal chat rooms, news groups and other web sites where criminals trade or sell stolen identities; Court Records - A Court Records alert/report may contain matches for name and date of birth from county courts, Department of Corrections (DOC), Administration of the Courts (AOC), and other legal agencies. The types of offenses include felonies, misdemeanors, sexual offenses, traffic citations and more; Sex Offender - A Sex Offender alert/report may contain matches for your identity with in Sex Offender registry files or may be an update to registered Sex Offenders in your zip code; Social Security Trace - A Social Security Trace alert/report may lists addresses associated with your identity found in public records. A Social Security Trace alert/report may contain matches for your identity found in public records. If you have utilized a nick name in the past when applying for credit or you have changed your last name due to marriage, additional names may be reported. The email ends with a reminder to the employee to log in <<https://opm.CSID.com>> to their account to view the details of this alert.

15. Q: What is OPM doing to prevent this kind of loss from happening again?

A: Because cyber threats are evolving and pervasive, OPM is continuously working to identify and mitigate threats when they occur. OPM evaluates its IT security protocols on a continuous basis to make sure that sensitive data is protected to the greatest extent possible, across all networks where OPM data resides—including those managed by government partners and contractors.

16. Q: I did not receive a letter stating that my information was compromised, but feel that I should have. Can you help me?

A: OPM has identified the individuals who have been impacted and began to notify individuals on June 8. They will continue to notify those who have been affected through June 19. As the investigation is ongoing, additional individuals may be further identified and OPM will issue additional notifications.

17. Q: Can my family members also receive services if they are part of my file/records?

A: OPM has indicated that family members of employees were not affected by this breach. Therefore, they are not entitled to the credit monitoring and identity theft services provided by CSID® through OPM.

18. Q: Does DON offer any services or information about identity theft?

A: The Department of the Navy Civilian Employee Assistance Program (DONCEAP) provides support for financial issues and identity theft for all DON civilians and their families. The 24/7 number is **1-844-DONCEAP** (1-844-366-2327) TTY 1-888-262-7848, International 001-866-829-0270. Information is also available at <http://DONCEAP.foh.hhs.gov>.

19. Q: I received a possible phishing. Is this related to the breach? Who should I report the possible phishing?

A: If you believe you have received a possible phishing scheme, please report it to your CIO or security office as soon as possible. Employees may also send potential phishing messages to NMCI_SPAM@navy.mil

20. Q: I've noticed the identity theft protection provided by OPM is only available for 18 months. Will the CSID® coverage be extended beyond 18 months?

A: At present, OPM will provide the credit monitoring and theft identity services at no cost to impacted individuals for 18 months. Impacted individuals will have \$1 million of identity theft insurance and access to full-service identity restoration provided by CSID®. OPM will continue to assess and evaluate the need for additional measures should they be necessary.

21. Q: Is there anything else I can do?

A: OPM has provided guidance on safeguarding identity which is found in this FAQ document.

Appendix A - Guidance for Federal Employees and Retirees:

The following guidance is provided by OPM:

- Don't answer unsolicited phone calls, in-person visits or e-mails from anyone asking about federal employees or other internal information in your agency.
- Don't provide personal information or any information about your agency or how it's organized to anyone unless you know them or have verified that they're legitimate.
- Don't reveal your personal or financial information in e-mail — and don't follow links sent through e-mail.
- Do not send sensitive information over the Internet before checking a Web site's security.
- Pay attention to the URL of a Web site. Malicious Web sites may look identical to a legitimate site, but the URL may use a variation in spelling or a different domain (e.g., .com vs. .net).
- If you're unsure whether an e-mail request is legitimate, try to verify it by contacting the sender directly. Don't use contact information provided on a Web site connected to the request — instead check previous statements for contact information. Information about known phishing attacks is also available online from groups such as the Anti-Phishing Working Group.
- Install and maintain anti-virus software, firewalls and e-mail filters to reduce some of this traffic (for more information, see Understanding Firewalls; Understanding Anti-Virus Software; and Reducing Spam).
- Take advantage of any anti-phishing features offered by your agency.
- Monitor your checking and other financial accounts, and immediately report any suspicious or unusual activity to your bank.
- Request a free credit report at www.AnnualCreditReport.com or by calling 1-877-322-8228. You're entitled by law to one free credit report per year from each of the three major credit bureaus. Contact information for the credit bureaus can be found on the Federal Trade Commission (FTC) Web site, www.ftc.gov.
- Review the FTC identity theft Web site, www.identitytheft.gov. The agency lists a variety of consumer publications that have a lot of information on computer intrusions and identity theft.
- Consider placing a fraud alert on your credit file to let creditors know to contact you before opening a new account in your name. Simply call TransUnion® at 1-800-680-7289 to place this alert. TransUnion® will then notify the other two credit bureaus on your behalf.

Appendix B - DONCEAP Identity Theft Information:

The following information is provided as a service by DONCEAP.

Are you a victim of ID Theft?

Has something like this happened to you?

- You get a phone call or letter telling you that you have been approved or denied credit for accounts that you never opened.
- You no longer receive your credit card statements, or you notice that some of your mail seems to be missing.
- Your credit card statement includes charges for things you know you never purchased.
- A collection agency contacts you they for an account you never opened.

It's possible you've become a victim of identity theft. If you suspect any improper or illegal activity is taking place, here are some recommended steps:

1. Order a copy of your credit report to see if any new accounts or credit inquiries show up. Virtually all of your credit information is in your credit report. If someone is opening accounts in your name, it should show up there. If you suspect you've been a victim of fraud (for example; you've had your mail stolen, lost your wallet, or been contacted by a collection agency for an account you've never heard of), you should contact the fraud department of each credit bureau. You are eligible for a free credit report sent via U.S. mail if are a victim of fraud or ID Theft.
2. Contact the fraud departments of each of the three major credit bureaus and report that you think your identity has been stolen. Request that a "Fraud Alert" be placed on your file and that no new credit be granted without your approval.
3. Research the crime and file complaints. Contact each company where you think you might have been a victim. Talk to their security or fraud department and explain what has happened. Review your account with them for any incorrect charges or a change of address. If you find something is wrong, you may need to close the account. If you open any new accounts, ask the company to put passwords on the account.
4. File a police report. File a report with your local police or the police where the identity theft took place. Get a copy of the report in case the bank, credit card company, or others need proof of the crime later on. Also, make sure that the crime is reported under identity theft.
5. Keep a log of all conversations and activities. Make notes of everyone you speak with; ask for names, department names, phone extensions, and record the date you spoke to them. Don't throw these notes away. Keep all notes and letters together in case they are needed in the future. Keep track of the time you spend documenting this information and lost hours at

work. You will need this information if the perpetrator is ever caught. You can be reimbursed for the time spent and hours lost.

6. File a complaint with the Federal Trade Commission (FTC). The FTC is the federal clearinghouse for complaints by victims of identity theft. Although the FTC does not have the authority to bring criminal cases, the Commission assists victims of identity theft by providing them with information to help them resolve the financial and other problems that can result from identity theft. The FTC also may refer victim complaints to other appropriate government agencies and private organizations for further action. If you're a victim of identity theft, you can file a complaint with the FTC by contacting their hotline.

By phone: Toll-free 1-877-ID-THEFT (438-4338)

Online: <https://www.ftccomplaintassistant.gov/#crnt&panel1-1>

7. Call the Social Security Administration if you suspect that your Social Security number is being fraudulently used.

By phone: Toll-free 1-800-269-0271

Online: www.ssa.gov

8. Contact the Internal Revenue Service if you suspect the improper use of identification information in connection with tax violations.

By phone: Toll-free 1-800-908-4490

Online: <http://www.irs.gov/Individuals/Identity-Protection>

9. For additional information on identity theft, including steps you can take to protect yourself from identity theft, or for assistance from DONCEAP's highly trained Fraud Resolution Specialists, civilian employees can contact DONCEAP 24 hours a day at 1-844-DONCEAP (1-888-366-2327) / (TTY: 1-888-262-7848) / International: 001-866-829-0270 or at DONCEAP.foh.hhs.gov.
