

Your Pet's Health Matters

Over the past several years, Army veterinary care has expanded from vaccination and deworming clinics to comprehensive wellness and medical care focused on comprehensive disease prevention with early diagnosis of problems and appropriate treatment.

In support of our transformation, we have hired more veterinary health care providers to expand our services and ensure your pet is receiving the individual attention he/she deserves. Recently, we have also implemented the use of ROVR, our remote online veterinary record.

We are restructuring some of our fees to support these expanded services. While we strive to keep our prices as low as possible, we must generate enough revenue to cover our operating costs.

We have suspended all privately owned animal surgeries for the next few months; however, please ask us for other options to meet your pet's surgical needs. Please check our website and Facebook page for further updates.

We know your pets are an integral part of your family and supporting their health is of the utmost importance to us. We are committed to the health of your pet and will continue to provide you and your animal family member with the valuable veterinary care that you have grown to expect from us. Thank you for letting us care for your pet.
