

**Federally Listed Threatened, Endangered, Terrestrial  
Wildlife and Plant Species and Ecosystem Affinities at Camp Pendleton**

Common Name	Scientific Name	ESA Status	Ecosystem	
			Terrestrial Upland	Wetland, Aquatic, and Marine
<b>Invertebrates</b>				
Riverside Fairy Shrimp	<i>Streptocephalus woottoni</i>	Endangered	X	X
San Diego Fairy Shrimp	<i>Branchinecta sandiegonensis</i>	Endangered	X	X
<b>Fish</b>				
Southern California Steelhead	<i>Oncorhynchus mykiss</i>	Endangered	-	X
Tidewater Goby	<i>Eucyclogobius newberryi</i> <sup>1</sup>	Endangered	-	X
<b>Amphibians</b>				
Arroyo Toad	<i>Anaxyrus californicus</i>	Endangered	X	X
<b>Birds</b>				
California Least Tern	<i>Sternula antillarum browni</i>	Endangered	-	X
Western Snowy Plover	<i>Charadrius nivosus nivosus</i>	Threatened	-	X
Light-footed Ridgway's Rail <sup>2</sup>	<i>Rallus obsoletus levipes</i>	Endangered	-	X
Least Bell's Vireo	<i>Vireo bellii pusillus</i> <sup>3</sup>	Endangered	-	X
Southwestern Willow Flycatcher	<i>Empidonax traillii extimus</i>	Endangered	-	X
Yellow-billed Cuckoo, western DPS	<i>Coccyzus americanus</i> <sup>4</sup>	Threatened	-	X
Coastal California Gnatcatcher	<i>Poliophtila californica californica</i>	Threatened	X	-
<b>Mammals</b>				
Pacific Pocket Mouse	<i>Perognathus longimembris pacificus</i>	Endangered	X	-
Stephens' Kangaroo Rat	<i>Dipodomys stephensi</i>	Endangered	X	-
<b>Plants</b>				
San Diego Button-celery	<i>Eryngium aristulatum</i> var. <i>parishii</i>	Endangered	X	X
Spreading Navarretia	<i>Navarretia fossalis</i>	Threatened	X	X
Thread-leaved Brodiaea	<i>Brodiaea filifolia</i>	Threatened	X	-
Encinitas Baccharis	<i>Baccharis vanessae</i>	Threatened	X	-
California Orcutt Grass	<i>Orcuttia californica</i>	Endangered	X	X

<sup>1</sup> A recent study classifies the southern populations of tidewater goby as a new species, the southern tidewater goby (*Eucyclogobius kristinae*) from the northern tidewater goby (*Eucyclogobius newberryi*) (Swift et al. 2016). No formal recognition of southern tidewater goby as a separate species has yet been published by USFWS in the Federal Register.

<sup>2</sup> Formerly light-footed clapper rail. The name change has not been formally published by USFWS in the Federal Register; however, CDFW has adopted the new name.

<sup>3</sup> A proposed taxonomic change has been made from least Bell's vireo (*Vireo bellii pusillus*) to California least vireo (*Vireo pusillus pusillus*) for populations occurring in San Diego County including MCB CamPen (Klicka et al. 2016). No formal change has been published in the Federal Register by USFWS.

<sup>4</sup> USFWS is listing a "distinct population segment" (DPS) rather than a species or subspecies. The western DPS of the yellow-billed cuckoo coincides with the range of the proposed subspecies boundary of the "western" yellow-billed cuckoo (*Coccyzus americanus occidentalis*). However, because there is some scientific uncertainty to the validity of the subspecies, USFWS is not listing the subspecies, but rather is listing the western DPS.
