

Smoke Alarms

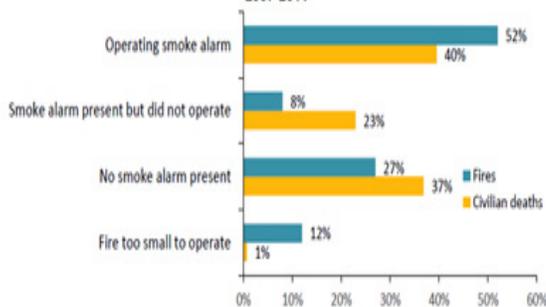

Smoke alarms save lives. If there is a fire in your home, smoke spreads fast and you need smoke alarms to give you time to get out (nfpa.org). Almost two-thirds of home fire deaths resulted from fires in homes with no smoke alarms or no working smoke alarms (nfpa.org, 2015).

Staying Safe with Smoke Alarms

- Install smoke alarms in every bedroom, outside each sleeping area and on every level of your home.
- Test your smoke alarms every month.
- When a smoke alarm sounds, get outside and stay outside.
- Replace all smoke alarms in your home every 10 years

Smoke alarms that are properly installed and maintained play a vital role in reducing fire deaths and injuries.
-NFPA.org, 2015

Reported Home Structure Fires and Fire Deaths by Smoke Alarm Performance
2007-2011

Smoke Alarms by the Numbers

(Courtesy of National Fire Protection Association).

- In 2007-2011, smoke alarms sounded in half of the home fires reported to U.S. fire departments.
- Three of every five home fire deaths resulted from fires in homes with no smoke alarms or no working smoke alarms.
- No smoke alarms were present in more than one-third (37%) of the home fire deaths.
