MCI-WEST SAFETY PRESS

# Hazards of Electromagnetic Radiation to Ordnance H.E.R.O.

## HERO Prevention:

- ◆ Observe safe separation distances when transmitting near ordnance operations
- ◆ Shield ordnance (containerization) from RF energy
- ◆ Frequency (MHz) and Power (Watts) Management

## MCI-West-MCB CAMPENO 8020.1A (Emissions Control Bill)

contains safe separation distances between radiating equipment and ordnance.

**Radio Frequency (RF) generated by radios and cell phones may result in the accidental initiation of ordnance.**

**NEED TO REPORT SOMETHING**
