

SAFETY GRAM

MCI*WEST SAFETY PRESS

Hazards of Electro-magnetic Radiation to Ordnance (HERO)

Radio Frequency (RF) generated by radios and cell phones may result in the accidental initiation of ordnance.

HERO Prevention:

- ◆ Observe safe separation distances when transmitting near ordnance operations
- ◆ Shield ordnance (containerization) from RF energy
- ◆ Frequency (MHz) and Power (Watts) Management

MCIWest-MCB CAMPENO 8020.1A (Emissions Control Bill) contains safe separation distances between radiating equipment and ordnance.
