

# Inerting Training Aids & Display Munitions

**SAFETY GRAM**  
MCI-WEST SAFETY PRESS

- Display munitions and training aids must be properly inerted and certified by Explosive Ordnance Disposal (EOD) technicians. Properly certified munitions will contain a label (typically red), etching, engraving, or steel stamping identifying the UIC of the organization who performed the inerting with a locally assigned serial number.
- Expended ammunition not containing internal cavities but obviously expended (At-4 rocket tube), may be certified inert by unit personnel providing they have a local serial number applied (UIC and locally generated number).
- All display munitions and training aids shall have associated documentation. Refer to MCO 5100.29C, Volume 8 for specific information and requirements or contact the Installation Explosives Safety Office at (760) 763-4817.
